

FERMENTAS MINIPREP KIT QUALITY & VALUE

GeneJET™ Plasmid Miniprep Kit

- HIGH YIELDS - up to 20 µg
- PURE - $A_{260}/A_{280} \geq 1.8$
- DNA is immediately ready to use
 - FastDigest® or conventional restriction digestion
 - PCR
 - automated fluorescent & conventional radioactive sequencing
 - transformation
- FAST AND EFFICIENT protocol
- COST EFFECTIVE - lowest price per prep
- Superior sequencing results

Fermentas is a leader in manufacturing and marketing of molecular biology products.

Our expertise, developed over thirty years, is the basis of our diverse product line which now includes restriction enzymes, DNA/RNA modifying enzymes, PCR-related products,

Long Sequencing Reads

ladders/markers for DNA, RNA and protein analysis, transfection reagents and molecular biology kits.

We are committed to supplying superior products backed by the best possible support and service.
