

High Quality Total RNA Purification

NEW GeneJET™ RNA Purification Kit, #K0731, #K0732

- **Universal** – can be used for both cell and tissue samples from a wide range of sources.
- **Efficient** – high yields of total RNA.
- **Fast** – 15 minutes following cell lysis.
- **Pure** – an $A_{260/280}$ ratio >1.9.
- **Convenient** – spin columns are capped and assembled with collection tubes.

Product	Cat. #	Size
GeneJET™ RNA Purification Kit	K0731	for 50 preps
	K0732	for 250 preps

Total RNA purified from variety of sources

- M** – RiboRuler™ High Range RNA Ladder (#SM1821)
- 1** – mouse liver
- 2** – mouse spleen
- 3** – HeLa cells
- 4** – Cos-7 cells
- 5** – *Saccharomyces cerevisiae*
- 6** – *Escherichia coli* DH5α

1 µg of isolated total RNA was fractionated by agarose gel (1%) electrophoresis.
